About the founders of the system

Shanto Dorcey has trained with the Art and Science International Academy of Colour Technology, U.K in 1991. She is one of the Senior Teachers, and teaches the Bridge Course throughout the world. Shanto is also a Tai Chi instructor, Reiki Master with the International Reiki Alliance, massage therapist, and is trained in Subtle Body Healing.

Robert Abrahamson, OMD, L.Ac., has been an acupuncturist and herbalist for more than 35 years. He is also certified in Osho Subtle Body Healing and Osho Metaphysical Surgery. Robert is the co-author of Osho Divine Healing: A SpiritMindBody Workbook. He is on faculty at the Academy of Chinese Healing Arts in Winterthur, Switzerland and the Phoenix Acupuncture College. He lives in Sedona, Arizona where he maintains a private practice.

Colour and Light on the Pathways Unfolding the Subtle Anatomy of Man in Relation to Aura-Soma®

General information

Four extensive colour courses in metaphysical energy work with Shanto L. Dorsey and Robert Abrahamson, a Doctor of Chinese medicine. Initiated by Mike Booth, the director of ASIACT, UK, these trainings utilize the Light Beamer Pen, Pomanders and Quintessences of Aura-Soma, in order to illuminate the acupuncture organ and meridian systems via the electromagnetic fields of the human aura. Light communicating with the cells of the body brings awareness to our potential and gifts on the soul level.

The colourpuncture points on the body are the ancient nadis of aryurveda, the vibrational chakras that open us to our inner beauty. We will be exploring Oriental cosmology: astrology, inner feng-shui, bagua, the eight extraordinary vessels, aromatherapy, the astral subtle bodies and crystal healing. Practical treatments will be extensively shown on issues such as menopause, grief work and emotional well-being.

The Aura-Soma® Beamer Light Pen

is a leap in Light Therapy. It has been developed to focus the energies of Aura-Soma into the sensitive areas of the body e.g. chakras, meridians, acupuncture points, and the subtle energy fields around the body. The dual colour combination vials, which contain the energies of the Equilibrium

bottles, featuring the vibrations of colour, plants and crystal energies have been specifically selected for application on the energy points of the body.

Each vial will bring a different quality to whichever pathways it is brought into contact with. In this way personal energies may be modified and enhanced. These energies will support the flow of Chi around our bodies for well-being and bringing the gifts and potentials more fully into our lives. The Light Pen is also well suited to work with the densities within our subtle bodies. The study and work with the light is a vast subject and ready to be received in this time of our evolution.

Beamer Light Pen Training Courses

Colour and Light on the Pathways® is part of the official educational trainings of the Art and Science International Academy of Colour Technologies, U.K. The course has been initiated by Mike Booth, and is now led by its co-creators - Shanto L. Dorsey, a senior Aura-Soma teacher and presenter of the Bridge Course, and Robert Abrahamson, an expert in Chinese medicine, acupuncture and metaphysical energy work.

The Beamer Light training consists of 4 levels

Level I is designed for everyone who wishes to explore this beautiful system, especially those already working in the therapeutic field.

Upon completion of this course, the participant will have sufficient knowledge and practice to offer

a number of different treatments.

This course is accredited by ASIACT, and will be certified by the Academy. Each Level comes with a forty page workbook. Laminated posters of course material are also available.

The Course Content - Level I

- The language of Colour from the Aura-Soma and Oriental perspectives
- The latest scientific research concerning the photo-sensitivity of the skin
- Balancing the Chakras
- Exploring the Subtle Bodies
- Use of Pomanders and Quintessences on the Subtle Anatomy
- Exploring the meridians and acupuncture points with the Beamer Light Pen
- Techniques of tonifying and dispersing energy
- Yin/Yang polarity colour combinations
- The Master Spirit points
- The use of the Beamer Light Pen on acupuncture points, based on the client's colour choice
- Stroking the Meridian pathways
- Reconnecting with our gifts and potential through the subtle anatomy
- Developing the art of repair and synchronicity with a client
- Designing a series of sessions
